

NEW!

CLEANSTREAM™

*ProPulse Patent Pending Performance
Car Wash Cleaning Hose*

The new car cleaning industry standard!

Wire braided car wash hose has not changed much in more than 50 years. And by now, you know how much we hate the status quo. Traditional rubber hose is heavy, leaves marks and is hard to handle. ProPulse® is proud to introduce this revolutionary, new and application specific solution for the most demanding high performance cold water hose. Exclusive to ProPulse, this patent pending product is ideally suited for car wash tunnels, self-service bays and a whole lot more!

APPLICATIONS >

TEMPERATURE

Up to 140° F (71° C)
not for hot water or steam

PRESSURE

4,000 PSI

COMMERCIAL DUTY

WEIGHT

30% Lighter

IMPULSE

200,000 Impulses

FLEXIBILITY

Dynamic Bend Radius

ABRASION RESISTANCE

5 Times

POWER MOVING FORWARD™

HOSE CONSTRUCTION

- **INNER TUBE:** Water and chemical resistant polyester and polyurethane.
- **REINFORCEMENT:** One layer of braided high tensile steel wire.
- **COVER:** Exclusive matte finish thermoplastic polyurethane (TPU) for ease of handling.
- **LAMINATED:** Every layer is bonded together for extended life.

BENEFITS & FEATURES

- **MADE IN THE USA:** Every foot of ProPulse® CLEANSTREAM™ is designed, engineered and manufactured in the USA, assembled using imported and/or domestic end fittings.
- **LIGHTWEIGHT:** Why lug around more than you have to? Efficient material usage reduces overall weight up to 30 percent compared to similar rubber hose.
- **TRUE NON-MARKING:** All rubber hoses can leave surface marks (no matter what color), and CLEANSTREAM does not.
- **TEXTURED COVER:** All CLEANSTREAM hoses come standard with the high abrasion and snag resistant textured cover.
- **FLEXIBLE:** Highly flexible CLEANSTREAM materials result in a dynamic bend radius equivalent to or better than wire braided rubber hoses, especially in cold weather.
- **EASE OF HANDLING:** ProPulse exclusive textured cover reduces tack and snag tendencies during handling, dragging and reeling.
- **UNMATCHED ABRASION, OZONE, UV AND CHEMICAL RESISTANCE:** The proprietary high performance of the CLEANSTREAM cover is at least five times more abrasion resistant than similar rubber hose and also eliminates damage caused by exposure to ultraviolet (UV) light, ozone and chemicals.
- **KINK AND CUT RESISTANCE:** High tensile strength steel wire braiding ensures cut and kink resistance equivalent to standard rubber hoses.
- **COLOR MATCH:** Colored cover optional with volume purchases.
