INTRODUCTION

Next time you're in traffic, **take a look** at the back of any medium or heavy-duty truck/trailer and you'll likely find **ProPulse hose** playing a key role in fluid conveyance to power the hydraulic lift gate.

If you broaden your view, you'll find ProPulse innovates, engineers and manufactures custom fluid conveyance solutions for many well-known OEM brands. Our hoses are hard at work throughout mobile and off-highway hydraulic markets around the world.

Our technical service sets us apart from most hose suppliers, thanks to our extensive **engineering and design expertise**. We collaborate with our customers to ensure development of **practical, reliable solutions** that fit their individual needs.

As manufacturers, we can satisfy even the strictest OEM requirements in various industries such as construction, agriculture, forestry, material handling, utility, recreational vehicles, transportation and more.

Our customers depend on us, not only for **superior quality hose**, but for **genuine, competent customer service** and **100% on-time delivery**. We are committed to uptime. Be it our line or our customer's line, line down is never an option.

These core characteristics combined give our customers confidence that we will support their production lines better than anyone else. So, next time you need a hose solution...**take a look at ProPulse.**

**Dependable hydraulic hose assemblies
for your unique requirements.**

ASSEMBLIES

MEASURING THE LENGTH OF A CRIMPED HOSE ASSEMBLY

The overall length of the hose assembly is measured to the sealing surface of straight fittings or to the centerline of elbow fittings. See below:

Length Over Nipples

Length Between Male Nipple and Center of Female Nipple

Length Between Center Line of Angle and Banjo

Length Between Male Nipple and Center of Angle

LENGTH TOLERANCES FOR HOSE ASSEMBLIES	
OVERALL ASSEMBLY LENGTH	TOLERANCE
Up to 300mm (11.811") included	± 3mm (±0.118")
Over 300mm (11.811") through 450mm (17.717") included	± 5mm (± 0.197")
Over 450mm (17.717") through 900mm (35.433") included	± 7mm (± 0.276")
Over 900mm (35.433")	± 1%

When not specified by customer print, the above tolerances will be applied to all hose assemblies. These tolerances are standard as specified by the SAE J517 standard for hydraulic hose.

SELECTING THE PROPER HOSE ASSEMBLY

The “STAMPED” acronym is used to help remember the most important hose attributes to consider when selecting a hose assembly: Size, Temperature, Application, Material, Pressure, Ends and Delivery.

S

SIZE

› What is the size of the hose? Inside Diameter (I.D.)? Outside diameter (O.D.)? Coupled length (OAL)?

T

TEMPERATURE

› What is the temperature of fluid being conveyed and the environmental conditions?

A

APPLICATION

› How is the hose being used? Suction? Discharge? Pressure? Conditions to consider (i.e. abrasion, flexing and routing)?

M

MATERIAL

› What material is being conveyed through the hose (composition and concentration)?

P

PRESSURE

› What is the maximum pressure (PSI) or suction (in/HG)? SAE or DIN rating? Bend Radius?

E

ENDS

› What fittings do you want on each end or do you want it open ended? SAE rating?

D

DELIVERY

› When do you want the hoses? (Consider time for delivery, including testing, quality assurance and packaging.)

S.T.A.M.P.E.D. WORKSHEET

At ProPulse, we know that some projects require a custom hose solution. To help us quote and build the perfect hose assembly for your application, please complete this worksheet.

> NAME:

> COMPANY:

> PHONE #:

> E-MAIL:

> DATE:

S – SIZE

> What size is the hose?

> Inside diameter (ID):

> Outside diameter (OD):

> Coupled length (OAL):

T – TEMPERATURE

> Temperature of product being transferred: Min: Max:

> Temperature of the environment: Min: Max:

A – APPLICATION

> How is the hose being used? ☐ Suction ☐ Discharge ☐ Pressure

M – MATERIAL

> What material is going through the hose? (Please include product that is normally transferred, as well as any cleaning fluids.)

P – PRESSURE

> What is the maximum pressure (PSI) or suction (in/HG)? SAE or DIN rating? Bend Radius?

E – ENDS

> What fittings do you want on each end or do you want it open ended? (Type: elbow / long drop / male / female / swivel / plating)

D – DELIVERY

> When do you want the hose?

> Estimated annual usage (EAU) and typical purchase quantities:

> Testing required? ☐ Yes ☐ No

> Certification required? ☐ Yes ☐ No

OTHER NOTES

> Any issues with your current hose? Or objectives you are trying to address (i.e. flexibility, abrasion, environment, routing)?

HOSE INSTALLATION AND BEST PRACTICES

The ProPulse team can assist customers with harsh applications by providing the proper solution to meet their need. This can include ozone and UV resistant thermoplastic hose, intermediate abrasion resistant ROCK cover, or the extreme duty SHIELD cover.

For additional protection, a hose wrap or nylon cover can be added to help protect the hose from the rigor of use.

The ProPulse team can also help with routing solutions and advise the proper use of adapters and clamps to keep your hoses “happy” for years of trouble free service.

Following is a list of basic drawings that help with every day hose routing issues customers face. This guide can help aid in the proper routing and installation of hose assemblies in various applications.

HYDRAULIC HOSE

COVER OPTIONS WIRE SPIRAL/BRAIDED RUBBER

COVER COMPARISON CHART

FEATURE	STANDARD	ROCK	SHIELD
Wear and Abrasion Resistance when Compared to EN/ISO Requirements	Improved	Very High	Ultimate
Ozone Resistance Compared to EN/ISO Requirements	Improved	Very High	Outstanding

Quality Control Traceability on Each Hose/Assembly	✓	✓	✓
Flame Retardant		✓	✓
MSHA Approved Cover is Standard	✓	✓	✓
Salt Water and Weather Resistant		✓	✓
Ultra High Molecular Weight Polyethylene (UHMWPE) Protection			✓

ABRASION VALUES ACC. TO EN 853
(25N/2000 CYCLES)

OZONE RESISTANCE ACC. TO ISO 7326

THERMOPLASTIC VS RUBBER

Thermoplastic high pressure hose has the same technical specifications as its rubber counterpart. However, thermoplastic hydraulic hose provides numerous benefits which allow it to outperform its rubber equivalent in certain applications. Below are some of the advantages of thermoplastic over rubber. Contact the ProPulse customer service team to see if switching to thermoplastic hydraulic hose can benefit you!

ABRASION RESISTANT MATTE COVER

ProPulse thermoplastic hose uses a unique, matte textured finish which aids in resistance to abrasion. The distinctive covering gives the impression of a rubber hose and removes the stigma of a “cheap”, shiny thermoplastic product. The polyurethane cover and overall lighter weight also provide better abrasion resistance when compared to a wire-braided rubber hose.

UNLIMITED SHELF LIFE

Rubber never stops curing and UV exposure accelerates the curing process; therefore, rubber hose has a shelf life of only 6 years. Thermoplastic hose, however, is made with urethane, which is UV, ozone and abrasion resistant and has an unlimited shelf life.

HIGH IMPULSE LIFE

Our thermoplastic hose has been impulse tested per SAE protocol to meet 1 million impulses or over.

NO PINHOLES

Many rubber hose manufacturers reuse materials and produce hose using a mandrel. Both of these practices can greatly contribute to contamination, which is the primary cause of pinholes in hydraulic hoses. ProPulse thermoplastic hose is made with 100% virgin material (no regrind) and is produced without a mandrel.

20% LIGHTER THAN RUBBER HOSE

Depending on the length, thermoplastic hose can offer +/- 20% decrease in weight compared to rubber.

UV, OZONE AND CHEMICAL RESISTANCE

Thermoplastic hose utilizes a polyurethane cover which offers excellent resistance to chemicals, as well as UV and ozone resistance, in comparison to rubber. This is a huge advantage as hydraulic hose is often exposed to sunlight. Rubber hose can crack over time, exposing the wire braid and eventually leading to premature failure. With a thermoplastic hose, there is no cracking due to the resilience of the cover.

MADE IN THE USA

ProPulse thermoplastic hose is manufactured at our facility in Peosta, Iowa. By manufacturing in the U.S.A., our lead times are greatly reduced, allowing us to react quickly to increases in customer demand. Rubber hose, especially in today's supply chain, has lengthy lead times and large demand. Our thermoplastic hydraulic hose provides a better alternative, more quickly—many times in just 7-10 days.

HOSE CONSTRUCTION:

- › Inner Tube: Oil and water resistant synthetic rubber
- › Reinforcement: One layer of high tensile steel braid
- › Cover: Oil, abrasion and weather resistant synthetic rubber

MAIN APPLICATIONS:

- › Low to medium pressure hydraulic and return lines

TEMPERATURE RANGE:

- › -40°F / +212°F
- › -40°C / +100°C

INTERMITTENT SERVICE:

- › -40°F / +257°F
- › -40°C / +125°C

FULLY MEETS OR EXCEEDS THE FOLLOWING SPECIFICATION(S):

- › SAE 100R1
- › EN 853 1SN
- › ISO 1436-1 1SN / R1AT

NOTE:

- › Not all sizes stocked at all times. Some specifications may vary. Please inquire about availability. ProPulse reserves the right to make any engineering or material changes at any time to our products for enhancement, performance and quality.
- › Available in STANDARD, ROCK and SHIELD cover options.

⚠ WARNING: This product can expose you to chemicals including carbon black, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

HOSE CONSTRUCTION:

- › Inner Tube: Oil resistant thermoplastic
- › Reinforcement: One or two layers of high tenacity yarn
- › Cover: Oil resistant thermoplastic elastomer with high ozone and abrasion resistance (-2 and -3 are smooth cover; -4 through -8 are matte textured cover)

MAIN APPLICATIONS:

- › Medium pressure hydraulic application that requires high flexibility, tight bend radius and good abrasion resistance to weather and ozone
- › Agriculture, construction, forestry and mobile equipment; fork trucks; general hydraulic; hydraulic tools, lubrication systems; marine steering; snow plow
- › Non-conductive hose available

TEMPERATURE RANGE:

- › -40°F / +212°F
- › -40°C / +100°C

FULLY MEETS OR EXCEEDS THE FOLLOWING SPECIFICATION(S):

- › SAE 100R18 / 100R7* (sizes -2 through -6)
- › SAE 100R7 (size -8)

NOTE:

- › Not all sizes stocked at all times. Some specifications may vary. Please inquire about availability. ProPulse reserves the right to make any engineering or material changes at any time to our products for enhancement, performance and quality.
- › See page 10 for the benefits of using thermoplastic hose vs. rubber hose.
- › Made in the USA.

* This hose is dual branded — sizes -2 through -6 meet or exceed all SAE 100R18 requirements. Refer to page 27 for information on SAE 100R18 hose.

⚠ WARNING: This product can expose you to chemicals including carbon black, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

HOSE CONSTRUCTION:

- › Inner Tube: Polytetrafluoroethylene (PTFE)
- › Reinforcement: One layer of high tensile stainless steel braid

MAIN APPLICATIONS:

- › Extreme heat application
- › The tube has very high chemical resistance properties with a low coefficient of friction and resists deterioration due to flow

TEMPERATURE RANGE:

- › -65° to +500°F
- › -54° to +260°C

FULLY MEETS OR EXCEEDS THE FOLLOWING SPECIFICATION(S):

- › SAE 100R14

NOTE:

- › Not all sizes stocked at all times. Some specifications may vary. Please inquire about availability. ProPulse reserves the right to make any engineering or material changes at any time to our products for enhancement, performance and quality.

HOSE CONSTRUCTION:

- › Inner Tube: Oil resistant synthetic rubber
- › Reinforcement: One or two layers of high tensile steel braid
- › Cover: Oil, abrasion and weather resistant synthetic rubber

MAIN APPLICATIONS:

- › Medium to high pressure applications
- › This hose is similar to the SAE100R2 / EN853 2SN, but has a smaller outside diameter which achieves a tighter bend radius while providing a lighter weight and compact design when minimal space is available

TEMPERATURE RANGE:

- › -40°F / +212°F
- › -40°C / +100°C

INTERMITTENT SERVICE:

- › -40°F / +257°F
- › -40°C / +125°C

FULLY MEETS OR EXCEEDS THE FOLLOWING SPECIFICATION(S):

- › SAE 100R16
- › EN857 2SC
- › ISO 11237-1 R16
- › ISO 11237-1 2SC
- › ISO 18752*

NOTE:

- › Not all sizes stocked at all times. Some specifications may vary. Please inquire about availability. ProPulse reserves the right to make any engineering or material changes at any time to our products for enhancement, performance and quality.
- › Available in STANDARD, ROCK and SHIELD cover options.

* Hose as noted above meets or exceeds ISO 18752 requirements for 28 MPa hose

WARNING: This product can expose you to chemicals including carbon black, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

HOSE CONSTRUCTION:

- › Inner Tube: Oil resistant thermoplastic
- › Reinforcement: One or two layers of high tenacity yarn
- › Cover: Oil resistant thermoplastic elastomer with high ozone and abrasion resistance (-2 and -3 are smooth cover; -4 through -8 are matte textured cover)

MAIN APPLICATIONS:

- › Medium pressure hydraulic application that requires high flexibility, tight bend radius and good abrasion resistance to weather and ozone
- › Agriculture, construction, forestry and mobile equipment; fork trucks; general hydraulic; hydraulic tools, lubrication systems; marine steering; snow plow
- › Non-conductive hose available

TEMPERATURE RANGE:

- › -40°F / +212°F
- › -40°C / +100°C

FULLY MEETS OR EXCEEDS THE FOLLOWING SPECIFICATION(S):

- › SAE 100R18 / 100R7*

NOTE:

- › Not all sizes stocked at all times. Some specifications may vary. Please inquire about availability. ProPulse reserves the right to make any engineering or material changes at any time to our products for enhancement, performance and quality.
- › See page 10 for the benefits of using thermoplastic hose vs. rubber hose.
- › Made in the USA.

* This hose is dual branded — it meets or exceeds all SAE 100R7 requirements

⚠ WARNING: This product can expose you to chemicals including carbon black, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

HOSE CONSTRUCTION:

- › Inner Tube: Oil resistant synthetic rubber
- › Reinforcement: Two layers of high tensile steel braid
- › Cover: Oil, abrasion and weather resistant synthetic rubber

MAIN APPLICATIONS:

- › Medium to high pressure lines that require tight bend radius

TEMPERATURE RANGE:

- › -40°F / +212°F
- › -40°C / +100°C

INTERMITTENT SERVICE:

- › -40°F / +257°F
- › -40°C / +125°C

FULLY MEETS OR EXCEEDS THE FOLLOWING SPECIFICATION(S):

- › EN 857 2SC
- › ISO 11237-1 2SC
- › SAE 100R16*

NOTE:

- › Not all sizes stocked at all times. Some specifications may vary. Please inquire about availability. ProPulse reserves the right to make any engineering or material changes at any time to our products for enhancement, performance and quality.
- › Available in STANDARD, ROCK and SHIELD cover options.

* Hose is dual branded — meets or exceeds SAE 100R16 requirements

⚠ WARNING: This product can expose you to chemicals including carbon black, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

HOSE PROTECTION OPTIONS

Hydraulic hose reliability is crucial for equipment uptime and dependability, but challenging environments and applications push hose design to the limit. Once a hose has experienced cover damage and wear, it's only a matter of time before hose failure and machine down time will occur. When rough applications are the norm, it's essential to protect and prolong hose life to keep equipment functioning. **ProPulse offers several solutions to help defend against the leading causes of hose failure: combat abrasion and impact cover damage.**

TEXTILE SLEEVING

Sleeving can be applied to a portion, or the entire length of a hose to protect it from abrasion prone environments. ProPulse utilizes very tight knit textile sleeving that is 50% less bulky than Cordura, while still meeting or exceeding industry standards. Our sleeving also meets the stringent requirements for operator line of sight protection. The heavy 1300 denier construction has been abrasion tested to over 250,000 cycles per ISO 6945 testing. Depending on the requirements needed, ProPulse also can permanently attach the sleeving by use of steel crimp collars. This adds an extra guarantee that the hose protection stays where it is needed.

SLEEVE FEATURES:

- › Ultra tight construction contains oil spillage from pin hole leaks
- › Tight, smooth surface to resist water
- › 50% less bulky than Cordura
- › Densely twisted proprietary engineered fabric offers optimum UV & abrasion protection
- › MSHA# IC-234/1

SPECIFICATIONS:

- › Melting Point: 480°F/248°C
- › Denier: 1300
- › Material: Proprietary engineered fabric
- › Dim. Stability: Great resistance to sun, atmospheric agents and aging
- › Toxicity: Non-toxic
- › Made in the USA

FULLY MEETS OR EXCEEDS THE FOLLOWING SPECIFICATION(S):

- › EN982 ISO norm 833 EN414
- › Australian MDG41
- › RoHS
- › ISO 6945
- › Fed-STD191-Test Method 5309 for abrasion
- › ASTM D6770 for abrasion resistance of textile webbing
- › ISO 8031

NOTE:

- › Not all sizes stocked at all times. Some specifications may vary. Please inquire about availability. ProPulse reserves the right to make any engineering or material changes at any time to our products for enhancement, performance and quality.

SPIRAL GUARD

Spiral guarding can be applied during or after a hose is crimped. ProPulse spiral guard is made of heavy-duty high density polyethylene and can be used in applications from -40°F to 280°F. Spiral guarding offers a strong, flexible solution with a flat profile and beveled edges. It can protect hose from impact, abrasion, cuts and crushing loads, as well as provide UV protection. In some applications, spiral guarding is used to keep bundles of hose together to keep routing neat and hoses protected.

SPIRAL FEATURES:

- › High density polyethylene

APPLICATIONS:

- › Bundling multiple hoses
- › Prevents hose wear due to impact, abrasion and friction

SPECIFICATIONS:

- › Flat profile with beveled edges for safety
- › Temperature Range: -40°F to +280°F
- › UV resistant
- › Strong, flexible and lightweight
- › Made in the USA

NOTE:

- › Not all sizes stocked at all times. Some specifications may vary. Please inquire about availability. ProPulse reserves the right to make any engineering or material changes at any time to our products for enhancement, performance and quality.

SPRING GUARD

Plated steel spring guarding greatly protects hydraulic hoses from damage due to impact and compression. These guards are very common on construction equipment where hoses can be damaged due to the application/environment in which the machinery is working. The spring guard also acts as a bend restrictor or “kink guard” when the hose experiences excessive movement and bending near the coupling.

SPRING FEATURES:

- › Made in the USA
- › Protects hoses from impact, bending and compression

NOTE:

- › Not all sizes stocked at all times. Some specifications may vary. Please inquire about availability. ProPulse reserves the right to make any engineering or material changes at any time to our products for enhancement, performance and quality.

HYDRAULIC FITTINGS

HYDRAULIC FITTING CORROSION PROTECTION

Ensuring that fittings can endure corrosive environments is vital to long term performance in hydraulic systems. Corrosion resistance of plated steel parts plays a large role in the lifespan and serviceability of hydraulic hose. Customers continue to demand the highest standards of protection against elements for their high-pressure hose, and resistance to corrosion in every environment is a must.

Salt spray testing is a key test for assessing the corrosion resistance of hydraulic fittings. ProPulse rigorously tests supplied steel parts to both ASTM B117 and ISO 9227 standards, which are the most widely accepted methods of determining corrosion resistance in the industry. This method exposes fittings to a controlled saline mist, closely replicating harsh conditions like seawater or road salt exposure.

ProPulse's standard Cr+6 free zinc plating is rated and tested to meet or exceed 500 hours of continuous exposure to salt spray with no corrosive damage to the base metal. This mark greatly exceeds the SAE J516 minimum standard of 144 exposure hours to corrosion of the base metal (red rust). This extended exposure above industry specified duration provides assurance that the fittings used on ProPulse-made hoses will withstand the harshest corrosive conditions.

The Cr+6 free zinc plating acts as a sacrificial layer protecting the underlying base metal of the fittings. The quality and resilience of this layer is the backbone of the fitting's resistance to corrosion.

Additionally, the Cr+6 free plating is fully compliant with REACH and RoHS environmental regulations regarding hazardous substances. End users can have peace of mind knowing the plating of ProPulse fittings is both safe to handle, as well as environmentally friendly.

Left: Fitting prior to salt spray exposure. Right: Same fitting following 500 hours of continuous salt spray exposure.

APPENDIX

CHEMICAL RESISTANCE & APPROVED FLUID MEDIA

ProPulse hoses are suitable for most mineral and synthetic oil based hydraulic fluids. This would include HL, HLP, HLPD and HVLP. Applications for oil-water emulsions HFAE, HFAS and HFB fluids are suitable for use. Additionally, water glycol solutions (HFC) are also suitable for use with ProPulse hydraulic hoses. Vegetable and mineral oil-based lubricants are also acceptable solutions that can be used with ProPulse hydraulic hoses as well. Biodegradable hydraulic fluids such as bio-oils, HETG, HEPG and HEES can also be used with ProPulse hydraulic hoses. In individual cases there may be restrictions due to manufacturer specific oil additives.

The wire braided hydraulic hoses noted in this catalog are also capable of handling compressed air up to a maximum of 725psi (50 bar) at a maximum of 176°F (80°C) with a restricted service life.

WARNING: This information shall be intended only as reference to hose compatibility with the internal fluids. No representations, guarantees or warranties of any kind are made to its accuracy, suitability for particular applications or the results obtained. Other operational factors may also impact the service life of the hose. Improper selection of fluid media can cause irreversible damage to hose and lead to premature failure. It is advisable to test the material under actual service conditions before specification. This information must not be used in conjunction with any other compatibility information from previous or future catalog editions, bulletins or publications. Incorrect use of this information can result in death, personal injury or property damage. For compatibility questions on specific fluids or additives please contact ProPulse representatives.

WARNINGS

Before selecting or using any ProPulse products, it is important that you read and understand the following:

Improper selection or improper use of hose, fittings, assemblies or related accessories ("products") can cause death, personal injury and property damage. Possible consequences of failure or improper selection/improper use of these products include, but are not limited to:

- › Fittings thrown off at high speed
- › High velocity fluid discharge
- › Explosion or burning of the conveyed fluid
- › Electrocuting from high voltage electric power lines
- › Contact with suddenly moving or falling objects that are controlled by the conveyed fluid
- › Injections by high-pressure fluid discharge
- › Dangerously whipping hose
- › Contact with conveyed fluids that may be hot, cold, toxic or otherwise injurious
- › Sparking or explosion caused by static electricity buildup or other sources of electricity
- › Sparking or explosion while spraying paint or flammable liquids
- › Injuries resulting from inhalation, ingestion or exposure to fluids

IF YOU "SEE IT", STOP IT!

Failure to properly repair or replace hose after exposing braid reinforcement layer can cause death, personal injury and property damage. Like strands in a bridge cable, each reinforcement fiber plays an exact role in the ultimate burst strength of the hose. A minor slice or nick in the reinforcement can result in total hose failure. The age of the hose does not matter! It is unfortunate, but even hose used one (1) time can become damaged in severe applications. These hoses must be immediately removed from service.

HOSE BASICS

1. Never exceed the maximum working pressure.
2. Never exceed the maximum working temperature.
3. Never apply pressure to a damaged hose.
4. High pressure hoses are designed to use specific fittings or tooling. Never use a different brand of fittings to tooling. Failure to do so can cause death, personal injury and/or property damage.
5. A kinked, crushed, or blistered hose will eventually fail. Do not risk injury. Immediately repair or remove hose from service.
6. Follow the pump/equipment manufacturer's instructions for pressurized hose testing.

PROPULSE LIMITED WARRANTY

Subject to the limitations stated herein, Schieffer Co. International, L.C., dba ProPulse (Seller) warrants that the products manufactured by Seller identified below shall be free from material defects in materials and workmanship and shall perform the services for which they are intended when properly installed, under normal use, and under ordinary conditions, for:

HYDRAULIC HOSE: A period of 365 days from the date of shipment of the product to BUYER.

HIGH PRESSURE CLEANING HOSE: A period of 180 days from the shipment of the product to the BUYER.

Buyer must notify Seller in writing of a potentially defective product as soon as possible, which notice must provide the appropriate marked date codes, part numbers of the product and a description of the potential defect. Upon receipt of such notice, Seller shall, at its option and at its expense, examine such product at Seller's factory or such other location as Seller shall determine. Should Seller agree to a return of the product, Buyer shall follow in every respect the packaging and transportation instructions provided by Seller. In no case shall a product be returned without first obtaining the permission of Seller. If a product is proven to the satisfaction of Seller to be defective, then Seller shall, at its option and at its expense, repair or replace such product or reimburse Buyer for the price paid by Buyer for such product, and credit will be issued to Buyer to offset the expense of the return shipment to Seller for shipments within the continental United States. The cost of shipping to Buyer a repaired or replaced product shall be paid by Seller on the same shipping terms as the original shipment of such product to Buyer. Except as stated herein, Buyer shall assume all responsibility and expense for any dismantling, removal, reinstallation, and shipping in connection with this Limited Warranty, and no claims will be allowed for labor, shipping, materials, incidental, consequential, or other costs incident to the repair, replacement, or return of a product.

THIS LIMITED WARRANTY IS THE ONLY WARRANTY PROVIDED BY SELLER AND IS MADE IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND THOSE ARISING BY OPERATION OF LAW, TRADE USAGE, OR COURSE OF DEALING.

NOTWITHSTANDING THE FOREGOING, THERE ARE NO WARRANTIES WHATSOEVER ON PRODUCTS BUILT OR ACQUIRED WHOLLY OR PARTIALLY TO BUYER'S DESIGNS OR SPECIFICATIONS.

SELLER'S LIABILITY IS LIMITED TO REPAIR, REPLACEMENT, OR REIMBURSEMENT AS PROVIDED ABOVE, AND IN NO EVENT SHALL SELLER'S LIABILITY EXCEED THE PURCHASE PRICE OF THE PRODUCT(S) INVOLVED. THIS LIMITED WARRANTY PROVIDES THE EXCLUSIVE REMEDY AGAINST SELLER FOR CLAIMS RELATING TO PRODUCTS, WHETHER IN CONTRACT, IN TORT (INCLUDING

NEGLIGENCE), OR UNDER ANY OTHER LEGAL THEORY, AND WHETHER ARISING OUT OF WARRANTIES, REPRESENTATIONS, INSTRUCTIONS, OR DEFECTS FROM ANY CAUSE. IN NO EVENT SHALL SELLER BE LIABLE FOR OR OBLIGATED TO PAY ANY CONSEQUENTIAL, INCIDENTAL, SPECIAL, INDIRECT, OR PUNITIVE DAMAGES OF ANY KIND, INCLUDING, BUT NOT LIMITED TO LOST PROFITS. THIS LIMITED WARRANTY EXTENDS ONLY TO BUYERS WHO PURCHASE SELLER'S PRODUCT(S) DIRECTLY FROM SELLER ("ORIGINAL PURCHASERS"), INCLUDING MANUFACTURERS, RETAILERS, DEALERS, DISTRIBUTORS AND WHOLESALERS. THIS LIMITED WARRANTY IS NOT ASSIGNABLE OR OTHERWISE TRANSFERABLE BY THE ORIGINAL PURCHASER TO ANY OTHER PARTY. SELLER EXTENDS NO WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, TO "CONSUMERS," AS THAT TERM IS DEFINED IN THE MAGNUSON-MOSS WARRANTY ACT (15 U.S.C. SECTIONS 2301 ET SEQ.) AND THE REGULATIONS PROMULGATED THEREUNDER. IN NO EVENT SHALL THE DURATION OF ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE BE LONGER THAN THE PERIOD PRESCRIBED HEREIN.

This Limited Warranty shall not apply to product failure or defect: caused by external or internal abrasion, kinking, twisting, cutting, pulling, impact, use for the transfer or spray of flammable materials (including solvents, petroleum, and gases of any kind), use with fluids which exceed the product's labeled pressure or temperature limits, storm, fire, wind, accident, or similar casualty; where the product has been modified without the prior written authority of Seller; caused by installation or use of the product contrary to any instructions or specifications provided by Seller; caused by the improper installation, use, application, maintenance, repair, transportation, handling, or storage of the product; caused by the fault or negligence of anyone other than Seller or any other act or event beyond the control of Seller. Seller makes no warranties as to any products or product parts or components that are not manufactured by Seller, and such items may be warranted only to the extent of the original manufacturer's warranty, if any. The limitations of liability contained in this Limited Warranty shall be effective without regard to Seller's performance or failure or delay of performance under any other term or condition of any trade customs, warranty, or other agreement. No employee, representative, or agent of Seller, nor any other person, has authority to assume or incur on behalf of Seller any liability, obligation, or responsibility in place of or in addition to this Limited Warranty.
